SUMMARY

Final-year B.Tech (CSE, AI & ML) student who builds and deploys full-stack apps with typed APIs, auth, databases and automated tests, including products that use ML and LLMs. Finalist in 7+ national hackathons; solved 1,100+ DSA problems on LeetCode.

EDUCATION

Sanskriti University, Mathura Aug 2023 – Jun 2027
B.Tech, CSE (AI & ML). CGPA 8.50 / 10.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL.

Frontend: React, Next.js, Tailwind CSS, Vite, TanStack Query.

Backend: Node.js, Express, FastAPI, Flask, REST/OpenAPI, SSE, SQLite, Alembic.

Tools: Docker, Git/GitHub, Vitest, pytest, Render, Vercel. **ML:** scikit-learn, OpenCV, LLM APIs.

PROJECTS

BookLeaf: author support and communication portal | React, Express, TypeScript, SQLite, Claude API | GitHub | Live

- Two portals (author and admin): ticket queue with filters, search and overdue rules; live updates over Server-Sent Events; scrypt-hashed passwords, httpOnly sessions, CSRF origin checks and rate limiting.
- LLM triage and grounded reply drafts with zod-validated output and a rule-based fallback; OpenAPI 3.1 spec, 55 automated tests, deployed on Render.

StockWise AI: demand forecasting and inventory dashboard | Next.js, TypeScript, FastAPI, SQLAlchemy | GitHub

- Five-page dashboard with a typed API client, CSV upload with dry-run validation, versioned datasets and reorder recommendations; versioned REST API with Alembic migrations and 94 backend plus 11 frontend tests.

VisionInspect Pro: visual quality-inspection app | Next.js, TypeScript, FastAPI, SQLite, Docker | GitHub

- Nine-page Next.js app in front of a FastAPI inference service: upload or live camera inspection, a tested decision engine that cites its rules, searchable history, CSV/JSON export and printable reports.

BioPay Connect: palm-vein payment prototype (simulated biometrics) | React, TypeScript, Vite, Tailwind, shadcn/ui | GitHub | Live

- Responsive wallet app with split vendor and user panels, scan animation, dashboard and transaction history; deployed on Vercel.

AgriMarket: farmer marketplace (hackathon) | React | GitHub

- Marketplace prototype connecting farmers and buyers, with demo data.

EXPERIENCE

Computer Vision Intern, Ethernet Robotics Jul 2026 – Sep 2026

- Tested and validated computer-vision modules for robotics applications.

Machine Learning Intern, Ganpat University (SSRIP) May 2026 – Sep 2026

- AI-Based Real-Time Crime and Safety Risk Prediction System: built a hybrid fusion model on a Kaggle dataset, reaching 89% accuracy.

NLP Intern, Ganpat University (WSRIP) Dec 2025 – Apr 2026

- Built a Streamlit resume-screening app that ranks candidates with TF-IDF, BERT, hybrid and ensemble scorers, with PDF/DOCX/TXT upload and CSV/Excel export (code).

OPEN SOURCE AND LEADERSHIP

- Open-source pull requests: Open Food Facts (#13129, in review), Joplin (#14601), CircuitVerse (#7024), Submitty (#12473).
- Co-founder, AI Digitals and Unstoppable Coders; President, Technical Club. Mentored 300+ students across 15+ workshops.
- Hackathons: finalist in 7+ national events (Flipkart GRiD, SIH 2025, Walmart Sparkathon). LeetCode: global rank ~25.9K, 500-day badge.
